Form 2 – Revision History

Revision Date	Form # Changed	Reason for Revision (Updates to staff, policy, webpage, etc.)
<i>April 2020</i>	<i>All</i>	<i>Updated Forms</i>
<i>September 2024</i>	<i>All</i>	<i>New NJDEP Regulations December 2023</i>

Form 3 – Public Announcements

Part IV.B. and C.

1. Provide the link to the dedicated stormwater webpage for your municipality.
<u>https://wpnj.us/stormwater</u>
2. List the name and title of person(s) responsible for stormwater webpage postings/updates.
<i>Adam Nemeth, IT Director</i>
3. List the newspapers, social media outlets, websites, direct mailings (Email or postal), and other communication approaches typically used to inform/educate the public on stormwater program information and related events/activities.
<i>The Borough conducts activities that total at least 12 points, and include activities from at least three of the five categories as set forth in Attachment A of the Tier A Municipal Stormwater General Permit. The Borough website at (https://wpnj.us/dpw) posts all public outreach materials available from the NDJEP.</i>
<i>The Borough of Woodland Park maintains records of compliance with public participation requirements at the Department of Public Works located at: 1 Browertown Road, Woodland Park NJ and on the webpage: https://wpnj.us/dpw</i>

Form 4 – Post-Construction Stormwater Management in New Development and Redevelopment

Part IV.E.

<p>1. How does the municipality define “major development”? If it is different from the definition in N.J.A.C. 7:8, explain the difference.</p>
<p><i>“Major development” means an individual “development,” as well as multiple developments that individually or collectively result in:</i></p> <ol style="list-style-type: none"> <i>1. The disturbance of one or more acres of land since February 2, 2004;</i> <i>2. The creation of one-quarter acre or more of “regulated impervious surface” since February 2, 2004;</i> <i>3. The creation of one-quarter acre or more of “regulated motor vehicle surface” since March 2, 2021; or</i> <i>4. A combination of 2 and 3 above that totals an area of one-quarter acre or more. The same surface shall not be counted twice when determining if the combination area equals one-quarter acre or more.</i>
<p>2. Is the municipality’s stormwater control ordinance (SCO) the same as or more stringent than NJDEP’s model SCO? If more stringent, explain the difference.</p>
<p><i>The municipality has adopted a SCO that is the same as the NJDEP model SCO.</i></p>
<p>3. Describe the process for reviewing major development project applications for compliance with the SCO and Residential Site Improvement Standards (RSIS).</p>
<p><i>For major development projects the Borough is undertaking, the Borough Engineer is responsible for reviewing the stormwater management design.</i></p> <p><i>For non-municipal projects, the Planning Board Engineer reviews the stormwater management design for compliance with the water quality, water quantity, groundwater recharge and green infrastructure design standards as per NJAC 7:8 and the more stringent criteria included in Borough of Woodland Park’s SCO. If the project is deemed compliant with the SWM rule and Borough’s SCO, it is presented to Borough of Woodland Park’s Planning Board for approval.</i></p> <p><i>Throughout construction, the Borough’s Code Enforcement Officer and the Borough Engineer inspects the construction sites at project milestones to ensure that the project is constructed in accordance with the approved development plans.</i></p>
<p>4. Does your municipality have a mitigation plan included in your Municipal Stormwater Management Plan and Stormwater Control Ordinance? Indicate the location of records of all variances granted.</p>
<p><i>The municipality does not have a Mitigation Plan.</i></p>

<p>5. Indicate the dates of each iteration of the Borough's Stormwater Control Ordinance, starting with the initial adoption and including revisions.</p>
<p><i>The original SCO was adopted in 22 November 2006. Amended on 3 February 2021 and amended on 2 October 2024.</i></p>
<p>6. Indicate the dates of each iteration of the Borough's Municipal Stormwater Management Plan, starting with the initial adoption and including revisions.</p>
<p><i>The original Municipal Stormwater Management Plan (MSMP) was adopted in June 2008. Once the NJDEP has released the new guidance for the MSMP, the Borough will update their MSMP to the new standards.</i></p>

Form 5 – Ordinances

Part IV.F.1.

Ordinance	Date Adopted	Was the DEP model adopted without change? If not, explain how the municipality's is more stringent.	Entity Responsible for Enforcement	Fees & Fines
1. Pet Waste	<i>11/22/2006</i>	<i>Yes</i>	<i>Woodland Park Police Department and the Local Board of Health</i>	<i>\$<200</i>
2. Wildlife Feeding	<i>11/22/2006</i>	<i>Yes</i>	<i>Woodland Park Animal Control Officer, Heath Officer, or Code Enforcement Official</i>	<i>\$<200</i>
3. Litter Control	<i>11/22/2006</i>	<i>Yes</i>	<i>Woodland Park Police Department and/or Code Enforcement</i>	<i>\$<500</i>
4. Improper Disposal of Waste	<i>11/22/2006</i>	<i>Yes</i>	<i>Police Department, Code Enforcement and/or Public Works</i>	<i>\$1,000</i>
5. Yard Waste	<i>06/03/2009</i>	<i>Yes</i>	<i>Police Department, Code Enforcement and/or Public Works</i>	<i>\$<300</i>
6. Private Storm Drain Inlet Retrofitting	<i>06/03/2009</i>	<i>Yes</i>	<i>Police Department</i>	<i>\$<200</i>

7. Illicit Connections	11/22/2006	Yes	Police Department, Code Enforcement and/or Public Works	<\$1,000
8. Privately-Owned Salt Storage	10/02/2024	Yes	Property Maintenance Officer, Zoning Officer, Borough Engineer	\$<500
9. Tree Removal- Replacement	12/06/2023	Yes	Department of Public Works	\$50 Per Tree
List any additional stormwater-related ordinances the municipality has adopted that address issues beyond the scope of the MS4 permit. Include adoption date, entity responsible for enforcement, and related fees and fines.				
<i>None</i>				
Indicate the location of records associated with ordinances and related violations and enforcement actions below.				
<i>Records of all ordinances and related enforcement actions are kept at the Borough Hall located at: 5 Brophy Ln, Woodland Park NJ and on the municipal stormwater website.</i>				

Form 6 – Street Sweeping

Part IV.F.2.a.i. and ii.

1. Provide a written description and/or attach a map outlining the sweeping schedule for the following:

- Segments of municipal roads with storm drain inlets that discharge to surface water (required at least 3 times each year)
- Segments of municipal roads that do not have storm drain inlets but do discharge to surface water (required at least 1 time each year)

Note: Only asphalt and concrete roads need to be swept. Roads that do not have storm drain inlets and do not discharge to surface water do not need to be swept.

The Borough of Woodland Park intends on maintaining its existing street sweeping program for all municipal streets as seen on the attached map. The Borough will sweep all streets a minimum of 3 times a year. The total length of all street sweeping is 48.55 miles and the schedule of maintenance is recorded in the DPW Office located at: 1 Browertown Road, Woodland Park NJ.

2. Indicate if sweeping work is outsourced and if so, describe the arrangement.

The Borough of Woodland Park does not outsource sweeping.

Form 7 – MS4 Infrastructure

Part IV.F.2-4. and Part IV.G.2-3.

1. Municipal Storm Drain Inlets

- a. Describe how you ensure that municipal inlets without permanent wording cast into the design have been properly labelled.
- b. Describe how you ensure that municipal and private storm drain inlets have been retrofitted.
- c. Describe how you ensure that newly installed storm drain inlets include corresponding catch basins or other BMPs to collect solids.
- d. Describe when and how you conduct inspections of storm drain inlets and the criteria used to determine when they need to be cleaned.

- a. *Our DPW crew conducts drive-by inspections of the storm drain inlets and open conveyances at which time they inspect the condition of the labels on storm drain inlets. If any buttons need to be replaced or paint needs re-stenciling, the DPW crew will make the repair or repaint as needed at that time or will schedule follow up work with the DPW supervisor.*
- b. *Throughout major development project construction and during repaving projects, the Code Enforcement Office or Borough Engineer performs site inspections and checks for proper storm drain inlet retrofits. Additionally, during day-to-day operations that entail driving through various areas of the Borough, DPW staff are instructed to observe storm drain inlets and note those that have not been retrofitted. If any are located along Borough roads or properties and are in areas that are known to have been repaved, they are identified by the staff for follow-up retrofitting and the responsible entity notified, if it is a private entity. As noted in the Private Storm Drain Inlet Retrofitting Ordinance, private entities are not authorized to complete repaving, repairing, resurfacing, reconstructing or altering any surface that is in direct contact with an existing storm drain inlet on that property unless the storm drain inlet already meets the design standards or is retrofitted or replaced to meet the standard.*
- c. *The Borough Engineer checks the plans for road projects and major developments to verify that a catch basin or some sort of BMP to capture solids is included with, or downstream of, the affect storm drain inlets. Records are retained in the annual certification that is filed with the NJDEP.*
- d. *DPW staff perform inspections of all storm drain inlets at least annually as they drive the roads of the Borough. The staff will either decide to stop then to remove any debris off the inlet grate and surrounding area and load the debris into their trucks for proper disposal or make a note of the location to return to conduct the cleaning within 1 week. Areas that clog and flood often during storms, such as Memorial Drive, are inspected more regularly and prior to large, forecasted storms, and cleaned if necessary.*

2. Municipal Catch Basins

- a. Describe when and how you conduct inspections of catch basins.
- b. Describe the criteria used to determine when catch basins need to be cleaned.

a. Borough of Woodland Park has 602 catch basins which are identified on our stormwater infrastructure map. Each year, we inspect at least 20% of the total catch basins on rotation and ensure that all catch basins are inspected at least once within the 5-year permit cycle. Areas that clog and flood often during storms are inspected regularly and prior to large, forecasted storms, and cleaned if necessary. DPW staff conduct a visual inspection using a flashlight and measuring pole.

b. DPW staff are trained to check for debris collected in the catch basin. All catch basins that are 40% or more full are scheduled for clean-out by a vacuum truck contractor within one month of inspection.

Additionally, catch basins that are in areas of recent flooding complaints are inspected within 1 week of the complaint.

The Borough also refers to previous records and puts those catch basins that have been noted as needing frequent cleaning on a more frequent inspection schedule.

3. Municipal Conveyance System

Describe when and how inspections of MS4 conveyance systems are conducted, and the criteria used to determine when they need to be cleaned. Include a description of the equipment and techniques used.

Similar to our procedure for inspecting our storm drain inlets as DPW staff drive the roads of the Borough for various activities. If there is noticeable trash or debris interfering with the stormwater flow, the staff is required to clean up the debris preferably immediately, but no later than 1 week.

On an as needed basis, sewer inspection cameras and jetting are used by National Water Main to view and clear enclosed pipe conveyances in areas associated with our catch basins, as we perform those inspections. If it appears that any ditches or swales need to be cleared, they will be added to our maintenance schedule to be completed as soon as possible, but no later than 3 months of the inspection.

Additionally, conveyance systems that are downstream of areas with recent flooding complaints are inspected within 1 week of the complaint.

We perform our outfall infrastructure inspections using the Department's Outfall Inspection Form when we inspect those outfalls for Stream Scouring and Illicit Discharges as noted below.

4. Municipal Outfall Inspections – Stream Scouring

Describe the program in place to detect, investigate, and control localized stream scouring from stormwater outfalls. Include a description of the equipment and techniques used.

The Borough of Woodland Park has 30 total outfalls. Each year, we inspect at least 6 outfalls (20% of the total) and the surrounding areas for scouring. If scouring is detected, we complete the Stream Scouring Investigation Recordkeeping Form. Any time we identify a new outfall (due to expansion or a change to our conveyance system or one we hadn't inventoried before), we inspect it, and check it for scouring within 30 days of identification.

In the cases where steam scouring is detected, we will attempt to trace it back to the source within 3 months. If a source is identified, the Borough would take corrective action if it related to municipally owned property or will ensure that the private entity(ies) perform necessary maintenance. If the Borough is unable to identify the source, the enforcement inspector and MS4 case manager will be notified before the end of the 3 months.

Additionally, outfalls are inspected within 1 week of any complaints.

All identified scour problems will be evaluated and prioritized for remediation as soon as possible. If remediation cannot be completed within twelve months, a schedule will be submitted to the MS4 case manager prior to the twelve-month deadline. All restoration shall be made in accordance with the Soil Erosion and Sediment Control Standards and the requirements for bank stabilization and channel restoration found at N.J.A.C 7:13, as per our Tier A permit requirements. Prioritization of repairs will be based in part upon extend of scour, potential safety threat, and need for NJDEP permit(s).

All pertinent repair records including the date, location, type of repair, and copies of all applicable NJDEP permits will be kept in the Department of Public Works. Past repairs will be inspected annually to ensure scouring has not resumed. Appropriate repairs will be made at those outfall locations where such resumption has occurred.

5. Municipal Outfall Inspections – Illicit Discharge Detection and Elimination

Describe the program in place for conducting visual dry weather inspections of municipally owned or operated outfalls. Include a description of the equipment and techniques used. Record cases of illicit discharges using the DEP's Illicit Connection Inspection Report Form from the Department's main stormwater webpage.

The Borough of Woodland Park has 30 total outfalls. We inspect at least 6 outfalls per year, which is 20% of the total. We check for dry weather discharges (72 hours after rain event), intermittent non-stormwater flow, and discoloration or inappropriate debris (such as toilet paper) in an immediately downstream of the outfall.

If complaints are reported or if any outfalls are found to have suspected illicit discharge, we reinspect within 30 days and sample in accordance with NJDEP's MS4 Guidance to determine if an illicit connection exists.

If an illicit discharge is detected, the Borough will begin the work to identify the source within 30 days. We fill out and submit the NJDEP Illicit Connection Inspection Report Forms for each suspected illicit discharge to submit within our Annual Report.

If the source is identified, the Borough will notify the property owner(s) of their violation of the Illicit Connection Ordinance and will have the connection eliminated immediately. If we are unable to locate the source of the illicit connection within eleven months, the Borough will notify the NJDEP Enforcement Inspector and the MS4 case manager within one month of the situation and to request an extension of the investigation period.

Any time we identify a new outfall (due to expansion or a change to our conveyance system or one we hadn't inventoried before), we inspect it, and check if for illicit discharge within 30 days of identification.

6. Other Municipal Infrastructure

List the types of MS4 infrastructure in your Borough that require inspection but are not noted above in items 1-5. Describe when and how you conduct inspections of this infrastructure and the criteria used to determine when they need to be maintained and/or cleaned.

There are no other types of MS4 infrastructure that the Borough is required to inspect

7. Stormwater Facilities Not Owned or Operated by the Municipality

Describe your program for ensuring adequate long-term cleaning, operation, and maintenance of stormwater facilities not owned or operated by the municipality. This should include your plan for ensuring annual inspections are being done on these private properties and describe how you record the locations and logs associated with private infrastructure.

For all other stormwater infrastructure, each December, Borough of Woodland Park sends out a form to all private stormwater facility owners for them to complete and return to the Borough by January 15th for the previous year. The form requires the location and type of each stormwater facility on the property and the dates and details of inspections, maintenance, cleaning and repairs that were performed. The form requires certification by the property owner that the stormwater facilities are functioning as designed, approved maintenance plans were followed (where appropriate) and has an area to explain if this is not the case.

In instances where the owners do not perform the necessary maintenance, the Borough may perform the maintenance and bill the owner.

When we receive the forms, we update our database. If we do not receive responses from an owner by the end of January, we will follow up with them by the end of the first quarter.

8. Infrastructure Records

Indicate the location of records related to stormwater infrastructure inspection, cleaning, maintenance, and repair activities.

Borough of Woodland Park keeps an inventory list of all stormwater infrastructure (municipal and private) with records of inspections, cleanings, routine maintenance work, investigations of illicit connections and scouring near outfalls, and repairs that have been done as well as those projected for completion each year. These records are kept in the DPW office.

*Department of Public Works
1 Browertown Road
Woodland Park, NJ*

Form 8 – Community-wide Measures

Part IV.F.2.

<p>1. Herbicide Application Management Describe your program for preventing herbicides from being washed into the waters of the State and to prevent erosion caused by de-vegetation.</p>
<p><i>Borough of Woodland Park does not apply herbicides at all. We do all de-vegetation by mowing or clipping and have not experienced erosion because of this practice.</i></p>
<p>2. Excess Deicing Material Management Describe your program for ensuring that excess salt piles are removed in a timely manner after storm events.</p>
<p><i>Borough of Woodland Park's DPW staff are trained to sweep up excess salt piles that remains on roadways and parking areas within three days (72 hours) after the storm is over, conditions permitting.</i></p>
<p>3. Roadside Vegetative Waste Describe your program for ensuring proper pickup, handling, storage, and disposal of wood waste and yard trimmings generated by the permittee along municipal roads or on municipal properties (trimming trees, mowing, etc.).</p>
<p><i>The Borough of Woodland Park maintains all roadside vegetation by trimming (leave in place). Trimmed trees are chipped and promptly disposed of by Environmental Renewal LLC. All areas of uncurbed roadside vegetation are monitored for erosion problems from vehicular traffic. Monthly inspections are performed to ensure that the Best Management Practices of the Permit are being executed.</i></p>
<p>4. Roadside Erosion Control Describe your program to detect and repair erosion along municipal roadways.</p>
<p><i>As DPW staff perform annual storm drain inlet inspections as noted above, they also check for erosion of shoulders, embankments, ditches, and soils along roads. If they notice any such erosion or sedimentation collecting in areas, including in the waters near the road, they log it in the maintenance schedule and fix the issue within three months. We either plant vegetation or use other methods, such as riprap in areas prone to erosion along roads to promote soil stabilization as described in the Standards for Soil Erosion and Sediment Control. We will contact our MS4 Case Manager for guidance for cases where planting will not remedy this issue.</i></p>

Form 9 – Municipal Maintenance Yards & Other Ancillary Operations
Part IV.F.5.

Please complete a separate Form 9 for each yard or site. Indicate the number of yards/sites the municipality owns or operates: 2

<p>1. Site Name and Address</p> <p><i>Department of Public Works 1 Browertown Road Woodland Park, NJ 07424</i></p>
<p>2. Monthly Site Inspections Describe the nature of inspections conducted at this site and the location of inspection logs.</p> <p><i>Daily inspections are conducted by DPW crew during daily operations. A trained DPW crew member walks the whole site at least once each month to ensure that all materials and machinery stored outside are stored in such a way that minimizes exposure to stormwater, ensuring the materials are on impervious surfaces as requires, and completely covered. Remedial actions taken during inspection, as well as those that are still needed are noted in the inspection log. Follow-up actions are scheduled for completion within one week. Specifically, we check if outdoor containers are covered and placed on spill platforms or clean pallets and labels are in good condition. We check that spill kits are accessible near liquid transfer areas. We check if bulk liquids are protected with secondary containment and that all accessories (hoses, valves, etc.) are in good condition and within containment area. We check that all outdoor refuse containers and dumpsters are always covered. We keep all inspection records in the DPW office.</i></p>

3. Inventory List List all materials and machinery that are potentially exposed to stormwater.	
Materials	Machinery/Equipment
<i>None</i>	<i>Pick-up trucks</i>
	<i>Trailers</i>
4. Discharge of Stormwater from Secondary Containment Describe the process in place for discharging stormwater from secondary containment areas where outdoor containers are stored.	
<i>Non-applicable. No material stored outside of the garage is held within secondary containment.</i>	
5. Fueling Operations Does fueling occur on site? If so, describe the BMPs in place to minimize contamination of stormwater from fueling activities. If not, explain where fueling takes place.	
<i>The maintenance yard has one (1) 3,000-gallon gasoline and one (1) 2,000-gallon diesel double walled aboveground fuel storage tank. All fueling operations are performed in accordance with the Best Management Practices. Drip pans are placed under hoses and pipe connections, inlets are block, and safety operations are posted during bulk fuel transfer. Equipment is immediately replaced or repaired when leaking or disrepair is discovered.</i>	
6. Vehicle/Equipment Maintenance and Repair Do you perform maintenance and repair on site? Is this conducted indoors or outdoors? If outdoors, describe the BMPs in place to minimize contamination of stormwater from maintenance and repair activities.	
<i>All maintenance is performed inside. However, any maintenance or repairs that are performed outdoors include the use of tarps and drip pans to collect motor vehicle fluids.</i>	

<p>7. Wash Wastewater Containment Do you wash vehicles on site? If so, describe the BMPs in place to minimize contamination of stormwater from these activities. Note that on site containment structures require annual inspections by a NJ licensed professional engineer. If not, explain where vehicle washing takes place.</p>
<p><i>All equipment and vehicle washing is performed inside of the garage located on-site. The wash wastewater is processed through an oil water separator attached to the sanitary sewer. Therefore, equipment and vehicle washing is performed in accordance with the Best Management Practices by eliminating the unpermitted discharge of wash wastewater to storm sewer inlets or waters of the State.</i></p>
<p>8. Salt and Other Granular De-icing Materials Do you store salt and other granular deicing materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>All salt and de-icing material is stored and handled in accordance with the Best Management Practices. All salt and deicing material is stored inside of the salt shed and one (1) 2,500-gal liquid calcium tank located on-site. Inspections and maintenance of the salt shed, liquid calcium tanks, and surrounding area are performed regularly; tracking of material from loading and unloading operations is minimized; and the area is swept regularly, in the event of tracked material and after loading and unloading is complete all loose material is collected placed back into the salt shed for reuse.</i></p>
<p>9. Aggregate Material, Wood Chips, and Finished Leaf Compost Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>All aggregate material, wood waste and finished leaf compost are properly disposed of at Environmental Renewal, LLC.</i></p>
<p>10. Cold Patch Asphalt Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>The Borough does not store cold patch asphalt.</i></p>

<p>11. Street Sweepings and Storm Sewer Cleanout Materials Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>All street sweepings, catch basin clean out, and other material are temporarily stored in 20-yard roll off container and properly disposed of by Suburban Disposal Inc.</i></p>
<p>12. Construction and Demolition Waste, Wood Waste, and Yard Trimmings Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>The Borough does not store construction and demolition waste. All wood waste and yard trimmings are properly disposed of at Environmental Renewal, LLC.</i></p>
<p>13. Scrap Tires Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p><i>The Borough stores scrap tires in a covered dumpster.</i></p>
<p>14. Inoperable Vehicles and Equipment Do you store inoperable vehicles or equipment on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater. If not, explain where they are stored.</p>
<p><i>The Borough does not store, accept or collect inoperable vehicles.</i></p>

Stormwater Permit Compliance DPW YARD/RECYCLING YARD MONTHLY INSPECTION RECORD

Municipality Name: _____

Year _____

The permittee shall inspect the entire site, including site periphery, monthly (under 30th day and set conditions when possible) and identify conditions that would contribute to stormwater contamination, illicit discharges or negative impacts to the municipalities MSA.

Inspection Criteria	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Notes/Corrective Actions
1 Uncontaminated stormwater discharge from fuel/chemical storage secondary containment													
2 Fueling Operations													
3 Vehicle/Equipment Maintenance and Repair													
4 Vehicle-wash wastewater containment													
5 Salt and Other Granular De-icing Materials													
6 Aggregate Material/Wood Chips/Finished Leaf Compost													
7 Cold Patch Asphalt													
8 Street Sweepings and Storm Sewer Cleanout Materials													
9 Construction and Demolition Waste/Wood Waste/Yard													
10 Scrap tires													
11 Inoperable Vehicles and Equipment													
12 Other Non Compliance with MS-4 Permit													
13 Inspector's Initials													
14 Date													
15 Time													

Enter Y (Yes) for Items Compliant or N (No) for Items Non Compliant with SPPP and MSA Permit. NA for Items not applicable
Items marked N require corrective action

Form 10 – Training

Part IV.F.6-10.

Stormwater Program Coordinators
Describe the training provided for the municipal Stormwater Program Coordinator.
<i>The Stormwater Program Coordinator (SPC) for the Borough of Woodland Park attends NJDEP training every permit cycle. Training covers the SPC responsibilities, permit conditions, annual reporting, and required submissions and documentation.</i>

Topic	Municipal Employees
	Examples: in-person or virtual group sessions, e-Learning, field trainings, and videos Describe the training provided for municipal staff.
SPPP	<i>Borough of Woodland Park trains staff whose job duties support the stormwater program. Training on the site-specific details in the SPPP, review MS4 permit requirements, and record-keeping is conducted annually via combined in-person/virtual training.</i> <i>This and all these training modules listed below are also recorded and made available for informational purposes for staff to re-review certain material presented, and for any absent or new staff, or staff that takes on new responsibilities prior to the next training session.</i>
Construction Site Stormwater Runoff	<i>Staff responsible for inspections of construction projects that disturb one acre of soil or more, are trained annually on relates MS4 permit conditions. Property owners must obtain a 5G3 permit from NJDEP prior to commencement of construction activities and must comply with their approved soil erosion and sediment plan.</i>
Post-Construction Stormwater Management in New and Redevelopment	<i>Staff responsible for implementing stormwater permit requirements receive an annual review of the fundamentals of the municipality's post-construction stormwater management program to address stormwater runoff. Training explains the municipality's definition of major development and the interconnection among the Stormwater Management rules at N.J.A.C. 7:8, the Borough of Woodland Park SCO, stormwater permit conditions, the Department's BMP Manual, and Guidance Documents.</i>
Community-wide Ordinances	<i>Staff responsible for implementing and/or enforcing stormwater-related ordinances receive annual training on related MS4 permit conditions and to review the purpose of each ordinance and what steps to take if violations are reported.</i>

Community-wide Measures	<i>Staff responsible for conducting activities associated with community-wide stormwater management measures attend annual training to discuss the MS4 permit requirements and Borough specific measures employed to comply with the street sweeping, storm drain inlets (labeling, retrofitting, and installations), herbicide application, de-icing operations, roadside vegetative waste, and roadside erosion control requirements. Information is also presented regarding current best management practices, safety equipment and procedures, frequency of activities, and proper documentation of work</i>
Stormwater Facilities Maintenance	<i>Staff responsible for conducting activities associated with inspections, maintenance and repair of stormwater infrastructure attend annual training on the MS4 related permit requirements. This training details what infrastructure is to be maintained according to approved manufacturer's maintenance plans, versus the remaining infrastructure that is to be maintained according to the NJDEP's BMP Manual. Training also includes requirements for current BMPs, safety equipment and procedures, frequency of activities, and proper documentation of work.</i> <i>All types of stormwater infrastructure in the Borough are addressed in the training, which includes but is not limited to storm drain inlets, catch basins, piped and open swale MS4 conveyances, stormwater infiltration basins, and manufactured treatment devices.</i>
Municipal Maintenance Yards and Other Ancillary Operations	<i>Staff responsible for conducting activities associated with our municipal maintenance yard attend annual training to discuss MS4 permit conditions, current best management practices, safety equipment and procedures, frequency of activities, and proper documentation of work.</i>
MS4 Mapping	<i>Boswell Engineering who prepared and submit our electronic mapping of stormwater infrastructure attend annual training to review the MS4 permit requirements for electronic mapping.</i>
Outfall Stream Scouring	<i>Staff responsible for conducting inspections and repairs of stormwater outfalls attend annual training to discuss how to identify, remediate, and document cases of stream scouring as described in the MS4 permit. Training also includes current best management practices, safety equipment and procedures, frequency of activities, and proper documentation of work.</i>
Illicit Discharge Detection and Elimination	<i>Staff responsible for conducting inspections and repairs of stormwater outfalls attend annual training to discuss how to identify, remediate, and document cases of illicit discharge as described in the MS4 permit. Training also includes the current best management practices, safety</i>

	<i>equipment and procedures, frequency of activities, and proper documentation of work.</i>
--	---

Stormwater Management Design Reviewers	
Describe the training provided for individuals responsible for reviews and approvals of stormwater management designs.	
<i>Individuals who review and approve stormwater management designs for major developments on behalf of the municipality are required under the MS4 permit to attend the mandatory NJDEP Stormwater Management Design Review course at least once every 5 years. They are required by the MS4 permit to also attend mandatory NJDEP training on amendments to the stormwater management rules at N.J.A.C. 7:8.</i>	

Municipal Board and Governing Body Members	
Describe the training provided for members of the planning/zoning board and municipal council.	
<i>Within 6 months of joining Borough council or the planning or zoning board, each member is required under the MS4 permit to watch the NJDEP video titled, Asking the Right Questions in Stormwater Review https://nj.gov/dep/stormwater/asking_the_right_questions.html.</i>	
<i>Each term thereafter, members are required to watch another NJDEP video from the choices provided on the stormwater training webpage:</i>	
<i>Stormwater Management Rules Applicability http://nj.gov/dep/stormwater/training.htm</i>	
<i>Stormwater Management Rules Planning http://nj.gov/dep/stormwater/training.htm</i>	
<i>Stormwater Management Rules Design & Performance http://nj.gov/dep/stormwater/training.htm</i>	
<i>Stormwater Management Rules Safety http://nj.gov/dep/stormwater/training.htm</i>	
<i>Stormwater Management Through General Permit for MS4s http://nj.gov/dep/stormwater/training.htm</i>	

Training Records	
Indicate the location of training records for the above required training.	
<i>Logs of all training including the type of training, date conducted, attendees and trainers are kept in the DPW office.</i>	

Form 11 – MS4 Mapping
Part IV.G.1.

1. Provide a link to the most current MS4 outfall/infrastructure map.	
<i>https://wpnj.us/stormwater</i>	
2. Indicate the total of each type of MS4 infrastructure listed below (due 01 Jan 2026).	
a. MS4 outfalls	30
b. MS4 ground water discharge points (basins or overland flow infiltration areas)	TBD
c. MS4 interconnections	TBD
d. MS4 storm drain inlets	602
e. MS4 manholes	TBD
f. Length of conveyance (channels, pipes, ditches, etc.)	TBD
g. MS4 pump stations	TBD
h. MS4 stormwater facilities (any that are not listed above)	TBD
i. Maintenance yard(s) and other ancillary operations	TBD
3. Describe how the municipality’s outfall/infrastructure map is reviewed and updated to reflect any new or newly identified MS4 infrastructure (e.g., an outfall is closed, a new basin is constructed, ownership of an outfall has changed, etc.).	
<i>DPW staff coordinate with the Borough Engineer to discuss any new major development projects happening around the Borough throughout the year. All infrastructure being built for those projects are then mapped, and the corresponding data is submitted to our MS4 Case Manager.</i>	
4. Describe how the municipality will create and update its MS4 Infrastructure Map.	
<i>We plan to continue working to complete the MS4 Infrastructure Map. Our staff will work to locate and map all stormwater infrastructure around the Borough until all infrastructure is mapped. Data will be converted into Shape files and submitted to our MS4 Case Manager before the mapping deadline of 01 Jan 2026.</i>	

Form 12 – Watershed Improvement Plan
Part IV.H.

1. Describe how your municipality is developing its Watershed Improvement Plan.
<p><i>The Borough of Woodland Park is gathering data to meet the requirements for the phase 1, Watershed Inventory Report, which is due and will be posted on our stormwater webpage by 01/01/2026</i></p> <p><i>We have been expanding on our stormwater infrastructure map to include these requirements. We have included the Borough of Woodland Park Environmental Commission and other stakeholders in our discussions to identify opportunities for public participation and education sessions.</i></p>
2. Describe any regional projects or collaboration efforts with other municipalities.
<p><i>The Borough does not collaborate with any other municipalities.</i></p>
3. Indicate the location of records related to all public information sessions and meetings for discussions of the Watershed Improvement Plan.
<p><i>Logs of all comments received during public information sessions and minutes from meetings will be kept in the municipal clerk's office.</i></p>
